DETAILED ACTION

1. Claims 1-27 are pending in the instant application

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8, 14, and 19-20, drawn to polypeptides, polynucleotides, vectors, host cells, method of producing polypeptides, method of identifying a ligand to the polypeptide.

Group II, claim(s) 9-11, drawn to antibodies.

Group III, claim(s) 12-13, drawn to ligands of the polypeptide, and a pharmaceutical composition comprising said ligands.

Group IV, claims 15-18, drawn to compounds and methods of screening compounds that alter the binding between the ligand and the polypeptide, and pharmaceutical compositions thereof.

Group V, claims 21, 23, and 24, drawn to methods of quantifying mRNA.

Group VI, claims 22-23, and 25, in so far as they are drawn to methods of quantifying/detecting polypeptide.

Group VII, claims 26-27, drawn to compounds that alter the expression level of the polypeptide.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The polynucleotides, polypeptides, vectors, host cells, and method of producing polypeptide of Group I, the antibodies of Group II, the ligands of Group III, and the compounds of Groups IV and VII are structurally and functionally different chemical compounds, each of which can be made and used without the other compound. The methods of Groups V and VI require either quantifying mRNA or the polypeptide. The methods require compounds which are structurally and functionally different chemical compounds, each of which can be made and used without the other compound, and the steps and methods of the groups are different. Lack of unity is shown because these compounds lack a common utility which is based upon a common structural feature which has been identified as the basis for that common utility.

3. A telephone call was made to Kathryn Piffat, Ph.D. on 5/12/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1647

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
